

Follo Corpus Masolett (M)

Follo Futura has been producing treatment tables for a number of years. The Follo Corpus M model, one of Europa's most acknowledged examiner,- and treatment table, is a modernized version of the Masolett type.

Follo Corpus Masolett, 2 puter
(113-119100-P) PRIMA

The Corpus M model comes with three different cushion solutions; variants with two, three or five cushions. For all variants, the head cushion is adjustable between 40 degrees up and 90 degrees down. In the three cushion variant the foot cushion/ the foot pad might be adjusted up to 63 degrees. In the five cushion version, arm pads are adjustable as well. This gives the Follo Futura M table great flexibility for examinations and treatment.

Follo Corpus Masolett, 3 puter

Physiotherapists might choose between electric or hydraulic lift mechanism. The table standard has a control wheel lift system and operating handle for electric and hydraulic pump for manual adjustment (lowering/raising). The electric lift mechanism has rail control, and offers a choice between foot switches, hand control or foot pedal.

Follo Corpus Masolett, 5 puter
(113-119100-C) CERVI

The lifting capacity of Follo Corpus M is 170 kg, and the maximum static charge is 250 kg. The table itself weighs 75 kg. Standard cushions length is 197 cm and the width is 70cm. It can be raised to max 97 cm and lowered to 45 cm.

As extra we offer "traction banana", nose holes plug and tissue roll paper holder. The tissue paper roll holder might be mounted at the head or foot end.

The cushions softness is much appreciated by patients. Tables are delivered with synthetic leather coating in six standard colours; black, anthracite, orchid, cyclamen, egg shell and cornflower blue. The steel support frame is delivered with a grey powder coating surface that is easy to clean.
