

Follo Corpus SX

Follo Futura introduces a new generation of affordable treatment and examination benches.

Our customers will not only receive the highest quality; they will also receive our product at an unbeatable price.

The product has the most up-to-date and modern design. The construction allows for linear raising and lowering of the bench. It is delivered with a foot pedal for easy adjustment. The bench stands on permanent and stable legs with adjustment controls on 1 of the legs for optimal stability on any type of floor.

The headrest can be adjusted -90 degrees. The SX can be delivered with 2 or 3 headrests, depending on the customer's needs. The footrest on the alternative with 3 headrests can be raised to a 70 degree angle for treating patients in a sitting position.

The Follo Corpus SX has form-cast cushions much appreciated by patients because the surface is very comfortable.

The bench is delivered in Skai synthetic leather with 6 standard colours: black, anthracite, orchid, cyclamen, eggshell and cornflower blue.

The bench has a steel support frame with a standard grey powder coated surface, which is easy to clean.

The bench is constructed for a maximum load of 225 kg. It weighs 74 kg. The standard length of the cushions is 201cm with a standard width of 70 cm. The bench can be raised to a maximum height of 102 cm and may be sunk to a minimum height of 50 cm. Extra equipment includes handheld controls, a nose hole plug and a paper roll holder. The paper roll holder can be mounted at either the top or bottom end of the bench.

The bench is manufactured entirely in Norway.
