## NC25 SEATED CALF RAISE WITH QST\*

\*QUICK START SYSTEM

### THE KEY POINTS OF TANNAC RANGE

#### **DURABILITY**

Mechano-welded frame with 3,2 mm tubes, steel rear stack guard, hauling straps at very high strength. TANNAC machines are designed for intensive use.

#### **STRENGTH**

TANNAC machines, like all our ranges, are the result of our knowledge developed in high performance sport. They respond to high requirements in terms of biomechanics. Loads are adjustable to match the most demanding user's needs.

#### **CHOICE**

Optional frame colour (grey as standard), upholstery (standard black), logo embroidery are available

#### KEY POINTS NC25 – SEATED CALF RAISE

#### ADJUSTABLE KNEE PAD

In order to fit to all types of bodies, the knee pad of the NC25 can be adjusted (height)

#### QUICKS START SYSTEM

The Quick start system is designed to help the user at the beginning of the movement. It consists in slightly rising the knee pads to lighten the load on the first rise and avoid injuries

#### GRIP HANDLES

Grab handles grants stability to the user while performing the movements. Their ergonomic position makes it possible to train in a correct and safe posture

LAROQ

#### TECHNICAL DATA

CHARACTERISTICS	DESCRIPTION
Length	135 cm
Width	110 cm
Height	230 cm
Weight	205 kg
Standard load	80 kg
Maxi. load	140 kg
Maxi user weight	150 kg
Frame	Oval steel frame - 3,5mm/average
Stack guard	Rear
Upholstery	Black (other colours optional)
Load transmission	High resistance belting (4,5 tonnes)
Warranty	5 years on metal frame (excl. paint, upholstery and parts subject to wear)

STANDARD FRAME COLOUR	OPTIONAL FRAME COLOUR	
LAROG	I AROG	

#### **DESCRIPTION**

#### **LAROQ**

#### **KNOW-HOW**

#### WELDING

At the forefront of technology, we have a semiautomatic eight-axis welding robot. Its size and quality allow us to assemble all the sub-assemblies of the machines and ensure real quality.

The more specific parts are welded by an experienced team and then individually controlled.

#### **PAINT**

During the painting phase, our painters follow three key steps. Initially, they clean the parts apply a layer of antirust and protection. Then, paint is added by this process offers outstanding aesthetic quality as well as mechanical resistance electrostatic powdering.

#### **ENVIRONMENTAL PROTECTION**

We use recyclable 90% products. Our chassis are made of 100% steel and delivered by Austrian suppliers WUPPERMANN which guarantees character "infinitely recyclable of its steels" by encouraging the use of steel from the electrical industry to reduce its carbon footprint.

#### **EN957 STANDARDS**

All LAROQ machines are designed and manufactured according to the EN957 standards. They have been approved by an independent organization, COFRAC accredited. Tests are performed in the most demanding conditions (maximum displacement area, maximum stress, stability)

#### **CUSTOMIZATION**

#### **EMBROIDERY**

Made in France, we are able to customize your upholstery with your own embroidered paint. The ability to customize frame colors, upholstery colors, marking... you can completely customize your equipment.

#### SADDLERIES AND COLOR

The seats and cushions are entirely cut and hand-sewn in our upholstery workshop. We select the best manufacturers of natural or synthetic leathers to offer a wide range of colors and textures.

We place great importance on the quality of materials used in manufacturing and the details
